Cat H1

Incident Commander Considerations:

- Conduct and complete DRA
- Declare Tactical Mode
- Consider required agencies
- Consider implementing Major Incident Plan
- Direct firefighting actions
- Be aware of PAX exiting aircraft
- Direct rescue crew
- Direct all operational control and implement ICS
- Provide M/ETHANE report
- Maintain safe operations and ensure scene safety
- Direct other agencies
- Consider water consolidation/replenishment.

Crash 1 - MPRV/RRV Actions:

- Deploy vehicle at nose on to the aircraft taking wind direction into account
- Operate monitor and extinguish fire utilising mass discharge to create survivable conditions
- Driver to remain on vehicle to utilise monitor as covering jet
- Deploy hose reel or 45mm jet for personal protection and prepare for entry into aircraft
- BA team access aircraft and survivable conditions
- Confirm/make safe aircraft systems
- In hours of darkness use scene lighting and portable lighting where necessary
- Utilise Medics to triage casualties on board if survivable conditions are present
- Aid Medics in extricating casualties
- Cool airframe if required
- Consider further media application
- Provide scene safety.

Specific Aircraft Hazards:

- Rotors
- Flammable liquids
- Flammable/pressurised Gases

Further Considerations:

- Aircraft position and wreckage
- Leaking fuel
- Passengers
- Other agencies
- Environmental conditions
- Composite Materials in drifting smoke plume.
